

## **Instruction of wiring parking function.**

Porsche 987 Boxster / 987 Cayman 2005-08

**Step 1:** There are two wires come with the light:  
black: 2 pcs  
green: 2 pcs

**Step 2:** Please connect the black one to the black wire of the parking function of the light (negative), and connect the green one to the green wire of the parking function of the light (positive). Please do this way for both sides of the light.

**Step 3:** Please connect the other side of the wires to the bumper light (or side market light) of the car. Black one goes to negative pole and Green one goes to positive pole.
