

Intelligent Convertible Top Control
for Cabriolets and Roadsters

One-Touch Convertible Top Control

Raise and lower your convertible top at the touch
of a button or remotely using your factory key fob!

Alfa Romeo · Audi · BMW · Ferrari · Ford
Mercedes Benz · Porsche · Volkswagen

smart**TOP**

Control your convertible top by using your car key

Control your convertible top the same way you do your power locks by using your original remote control key fob - conveniently from a distance.¹

Open/close the convertible top while driving

Never again stop for your top: Thanks to the smartTOP module you can open/close the top while driving - at speeds up to 35 mph.¹

No permanent modification to your car

The plug-n-play installation of a smartTOP module is completed without modifying the factory wiring on your vehicle.²

¹For most vehicles listed

²smartTOP is easily removed when selling or turning in your leased vehicle

Being complicated is a thing of the past: Experience a new feeling for convertibles/cabriolets with smartTOP

As a convertible or cabriolet driver you appreciate the sunny side of life. With smartTOP your life can become even easier to manage and more elegant. Whether it is opening the convertible top by means of a remote control device or closing it while driving: In the following pages you can discover how smartTOP can significantly improve your everyday life with your convertible or cabriolet.

The smartTOP product series unites many years of experience that mods4cars have gained domestically and abroad as a specialist for vehicle electronics. Each individual module is developed and manufactured according to the same strict quality standards that are specified by the automobile manufacturers of the original equipment.

In this spirit we wish you even greater pleasure with your cabriolet.

This is how smart you can make your vehicle...

In everyday life a smartTOP module makes handling your convertible/ cabriolet easier and more elegant. Operating your convertible top is simpler and there is no need to familiarize yourself with extra buttons, key fobs or remotes.

On the following pages is a summary of the intuitive and convenient smartTOP features. (Availability depends on the model.)

Remote Control of Convertible Top

Control your convertible top conveniently by using your original factory remote control key or key fob. No additional remote control devices are required to open and close your convertible/cabriolet from a distance.

One-Touch Power Top

With the smartTOP "one-touch" convertible top automation you no longer need to hold the top button to open or close your convertible top. Now you can tap the button and your top opens or closes automatically.

This feature also allows your hands to remain free and you are able to focus on your driving.

Operate Top While Driving

Forget about the days you had to pull over to open or close your convertible top! Thanks to smartTOP you can now open or close your top while driving at speeds up to 35 mph depending on model.

Individually Programmable

Configure the features and functions of the smartTOP module to suit your personal preferences. All stored settings are retained even when the battery is removed.

Setup Menu in the Vehicle Display

You may configure the settings of your smartTOP module directly using the display of your factory on-board computer (dash) display. The individual options are displayed in plain English.

Passive Mode

You can deactivate the smartTOP module completely. This allows you to loan your vehicle to others that may not be familiar with the smartTOP features. The passive mode will allow factory electronic test equipment to be utilized without causing irregularities in their read-outs.

Extra Functions

In addition to the intelligent convertible top control, some smartTOP modules provide additional functions that you can easily learn to operate. Specific details and availability of the individual functions depend on the vehicle make and model.

Reversible Plug-in Installation

Every smartTOP module is shipped with all parts required and ready to install. The plug 'n' play installation is completed without cutting any wires. A smartTOP installation may be completely removed at any time allowing you to sell or return your leased vehicle to its original condition.
